End of Summer Term

This is our final Newsletter of this school year. A special thank you goes to our Eco Reps, now known as Eco Warriors, for their help and dedication this year. In case you don't know them they are: Aaron, Alfie, Callum, Chloe, Izzie and Sophie. They have been full of ideas and more than happy to share them and put them into practice within our school; they have happily led the Eco assemblies and always remind us of Eco meetings.

As you know we had building works at the start of the school year which made areas inaccessible so we took the opportunity to change our plans for our grounds. If you have any spare time next year we would be very grateful for any help you can give.

Our school year ran with our usual themes of Energy saving in the autumn term and the children gleefully restricted lighting during SwitchOff Fortnight and How Low Can You Go? Day. Spring term had Waste as its focus and we had a textile collection. Spring term's main focus was growing and each child planted a tomato seed and once the plant had established we sent them all home. We would love to know how many tomatoes were harvested and any photographs you have would be gratefully received for our noticeboard. Flower Fairies visited our planters at the front of the school and we had some very pretty flowers on display for the summer term. Thank you to all who took part.

There are many more activities taking place during the year and if you would like to get involved please contact us.

Please remember that we consider the whole school community as part of our Eco Team and all are welcome to attend our meetings. There are also suggestion slips available on the Eco noticeboard in the Link if you have any ideas.

We look forward to next year with additional children as we will have our Year 3 class in place. Many hands make light work! ☺

If you would like any further information on our Eco activities please speak with Mrs Dodd in the office or Mrs Bowling.
